

Organizers

**Margarita L. Dubocovich (Northwestern University)
David E. Blask (Bassett Research Institute)**

Opening Lecture

Melatonin: Historical Perspectives on the Work of Three Pioneers

- Session 1: Physiological and Molecular Regulation of the Melatonin Signal**
- Session 2: Methods to Study Melatonin Receptor Localization and Function**
- Session 3: Melatonin Receptors I: Structure, Ligands, and Signaling Mechanisms**
- Session 4: Melatonin Receptors II: Regulation and Efficacy**
- Session 5: Melatonin Receptors III: Melatonin Receptor Regulation of Physiological Function**
- Session 6: Melatonin Regulation of Sleep and Cardiovascular Function**
- Session 7: Melatonin in the Treatment of Circadian Disorders**
- Session 8: Therapeutic Role of New Melatonin Receptor Agonists**
- Session 9: Melatonin and Cancer**
- Session 10: Melatonin Receptors in Immune Function, Neuroprotection, Ischemia-Reperfusion Injury, and Neonatal Sepsis**

Online application is available now at <http://src.faseb.org>.
Please see http://src.faseb.org/pages/2008/a_igrants.html and
http://src.faseb.org/pages/2008/a_travelgrants.html for information
about prospective travel awards.
